LUNG REGION CLASSIFICATION (MedSAM AI Segmentation)

Anatomical Region	Severity	Status
Upper Right Lobe	**MEDIUM**	Moderately Affected
Upper Left Lobe	**MEDIUM**	Moderately Affected
Mid Right Lobe	**HIGH**	Critically Affected
Mid Left Lobe	**HIGH**	Critically Affected
Lower Lobes	**MEDIUM**	Moderately Affected

Interpretation(s)

The AI-based TB detection system uses a multimodal approach combining Deep Learning analysis of the Chest X-Ray image with clinical parameter scoring (cough duration, fever, weight loss, night sweats) to arrive at a fused probability score.

AI Recommendation: Immediate medical evaluation required. Isolate patient and schedule sputum test.

DISCLAIMER: This report is generated by an AI system for clinical decision support only. It is not intended to replace professional medical diagnosis. A qualified physician should evaluate these results in the context of the patient's full clinical picture. Confirmatory tests (sputum culture, GeneXpert, TST) are recommended for definitive TB diagnosis.
